WeRateDogs Twitter account Data Analysis

WeRateDogs is a [Twitter](#) account that rates people's [dogs](#) with a humorous comment about the dog. The account was started in 2015 by college student Matt Nelson, and has received international media attention both for its popularity and for the attention drawn to [social media](#) [copyright law](#) when it was suspended by Twitter for breaking these aforementioned laws. -wikipedia.

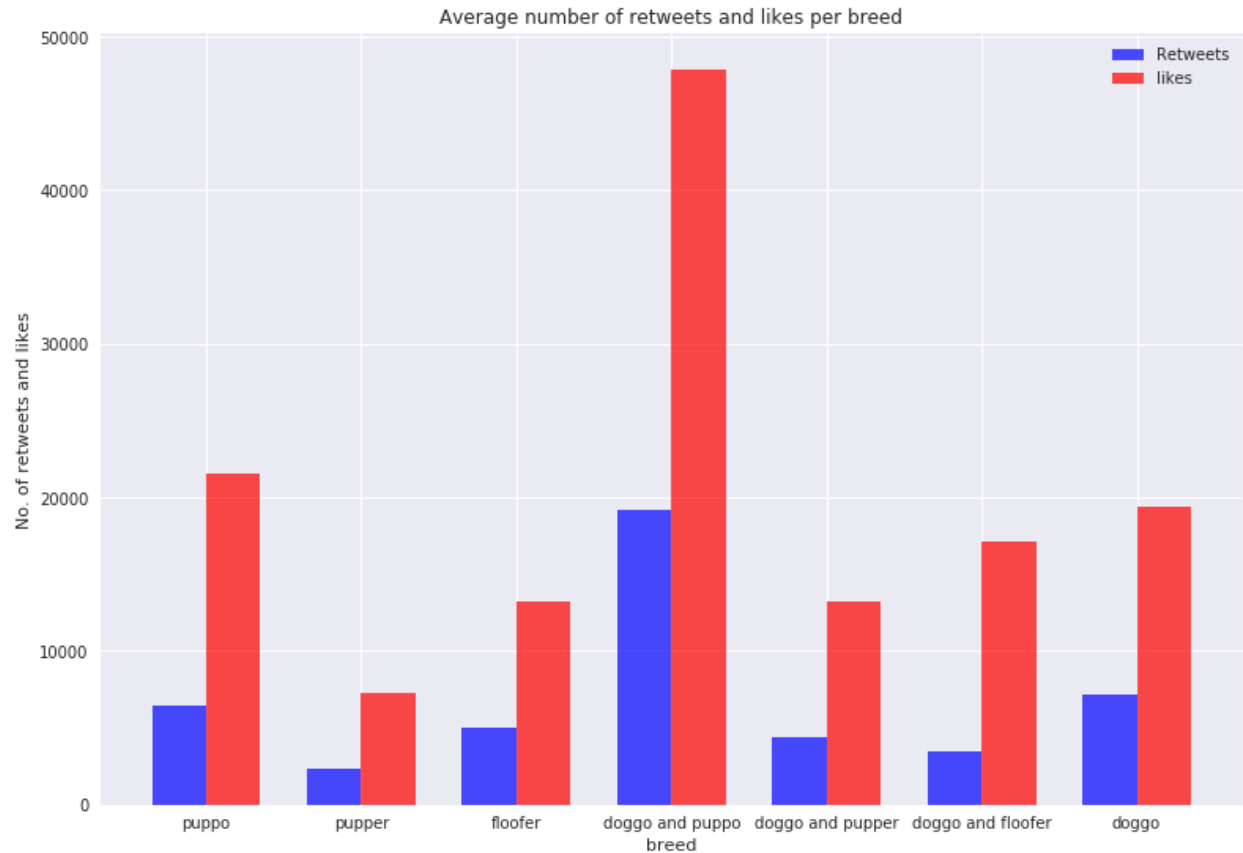

We tried to analysis this twitter account data be gathering some archive data

Then by using AI we extracted the dogs breed for each dog to complete the data, however, the data was lacking the retweets count and favorites count for each data so we use twitter API to gather this data from tweets to complete our analyzation.
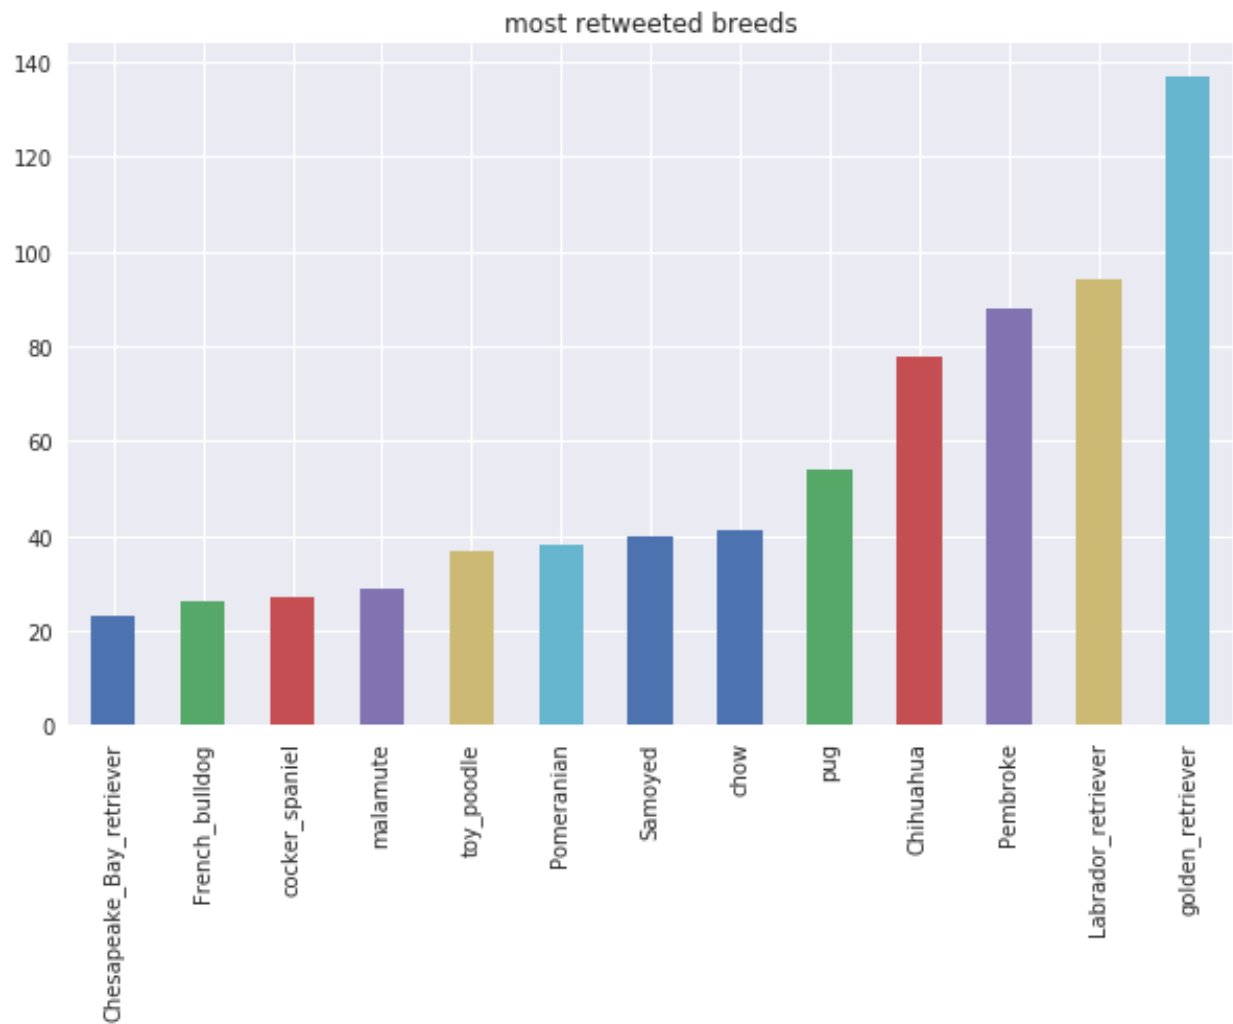

The data passed through many assessing and cleaning processes to be optimal for our visualization

Data Insights:
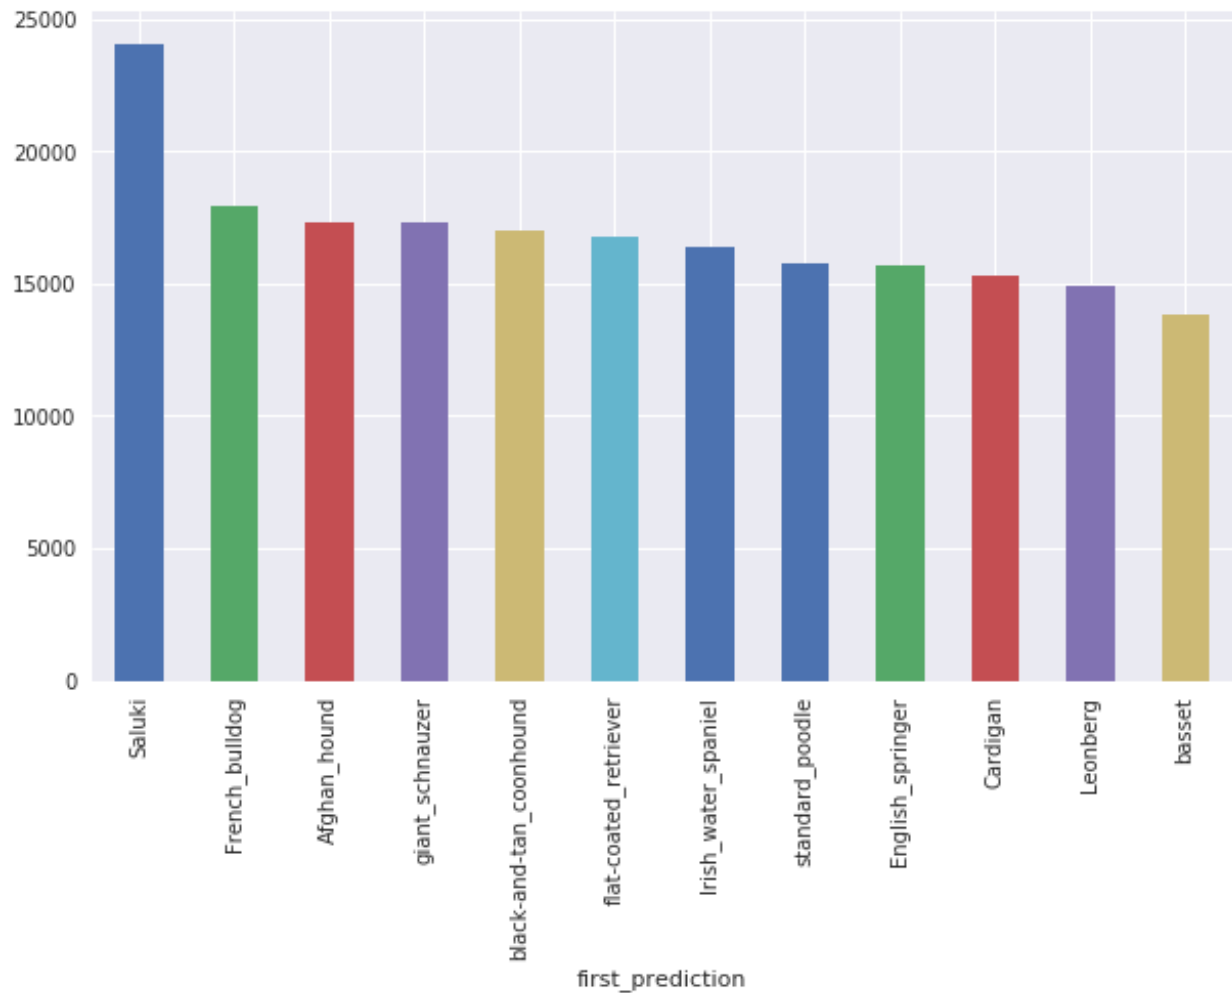

Average number of retweets and likes per breed

As we see in this chart which shows the correlation between dog stage and average received retweets and favorite for each stage

Doggo and puppo seems to get the most of love 😊 and we here there is a strong relation between likes and retweets for each stage

most retweeted breeds

In this chart the most retweeted breed as it seems is golden retriever followed by labrador retriever

So retriever at all is loved to be shared

On the other hands that does not continue in favorite category as Saluki breed gets most of favorite followed by French bulldog

So our data may help you if you want to know what your next dog breed should be if you want your dog photos to get most of love from people on social media☺
